OVERVIEW

I'm Julia Veliquette, a Full-Stack Software Engineer with a strong foundation in Python, JavaScript, and modern frameworks like React and Django. I excel at developing responsive, user-friendly applications and integrating APIs to bring dynamic functionality to life. With a keen eye for design and a passion for creating clean, efficient code, I'm always ready to tackle complex problems and deliver high-quality solutions. With a background in firefighting, I thrive in high-pressure environments and bring a problem-solving mindset to every project. I love transforming complex ideas into seamless digital experiences.

PROFESSIONAL EXPERIENCE

Freelance Software Developer | Remote | Jan 2024 - Present

- Conceptualized and executed a responsive website for a local brewery/restaurant, Cool Beerwerks, utilizing HTML, CSS, JavaScript, and Responsive design principles to elevate brand visibility and recognition
 - [Live App](#) | [Codebase](#)
- Designed and developed a responsive website for an online nursery business, Truckee Trees, using HTML, CSS, and JavaScript to drive significant enhancement in user engagement
 - [Live App](#) | [Codebase](#)

Firefighter | Nevada County Consolidated Fire District | Nevada City, CA | Jul 2021 - Present

- Delivered firefighting, medical, and rescue services in Nevada County during emergency calls to safeguard public safety and ensure swift resolution of critical incidents
- Performed training scenarios to bolster team and equipment readiness for medical emergencies, rescues, and fire incidents, resulting in enhanced team coordination

PROJECTS

JustJDecor | Full-Stack Engineer | Python, Django, SQL, JavaScript, React, NodeJS, Docker, Bootstrap, Pexels API | Aug 2024

[Codebase](#) | [App Demo](#)

- Developed a full-stack application for organizing home design ideas. Users can add rooms, projects, and pin idea photos to their projects
- Leveraged React on frontend for seamless interactivity and state management and integrated Bootstrap for responsiveness across devices

Project Plan | Full-Stack Engineer | Python, Django, SQL, JavaScript, Bulma | July 2024

[Codebase](#) | [App Demo](#)

- Created a project management application, featuring a task due date chart for efficient task organization across multiple projects
- Implemented a responsive and user-friendly interface with JavaScript and Bulma, ensuring seamless user experience across various devices and screen sizes

Eventure | Full-Stack Engineer | Python, SQL, FastAPI, JavaScript, React, NodeJS, Docker, Bootstrap, Google API | Sept 2024

[Codebase](#)

- Collaborated within a development team of three developers to create a full-stack application for travel enthusiasts to save and share experiences with friends
- Individually integrated Google API with geocoding, map, and places to autofill addresses and populate pins on a map. Contributed to both frontend and backend development

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML, CSS

Backend: Django, FastAPI, PostgreSQL, MongoDB, RabbitMQ, NodeJS.

DevOps: Docker, Git, Netlify, Insomnia, CI/CD

Frontend: DOM manipulation, Websockets, React, Bootstrap

EDUCATION

Hack Reactor | Remote | May 2024 - Oct 2024

Advanced Software Engineering Immersive Program

- Software Engineering professional training for building full-stack applications

REMSA | Reno, NV | Jan 2021 - Apr 2021

Advanced Emergency Medical Technician

- Completed training to earn Advanced EMT License

Butte College | Oroville, CA | Jul 2018 - Dec 2018

Firefighter 1 Certificate

- Completed intensive training to obtain Firefighter 1 Certificate
- Leadership Role: Captain for six weeks

California Polytechnic State University | San Luis Obispo, CA | Aug 2017 - Jan 2018

General Education

- Relevant Coursework: Precalculus Algebra

Sierra College | Truckee, CA | Jun 2014 - Present

General Education
